

Updating Your Zee S2 or SEL

1. Mouse over the **TOOLS** tab at the top of the page, then click **Setup**.
2. Click the Check for Update button to make sure that you are about to install the latest stable release.
3. If an update is available, click the **Install Version 3.0.x.x** button. Once you do, the system will inform you that it is about to restart, and you will be brought to a page with a countdown timer. You will be automatically redirected to your HS3 system when this is complete.

Note that you will see an option to update to a beta release of HS3. These are releases which are currently being tested, and are not guaranteed to be entirely stable. Unless there is a specific fix or feature you are looking for, we recommend ignoring beta updates.
