

DisableEventByRef

Purpose

This function marks an event as disabled. All triggers are suspended until the event is re-enabled.

Parameters

Parameter: **evref**

Type: **long (.NET Integer)**

Description: This is the event reference ID of the event to be disabled.

Returns

None

Example

Sample Code

```
sub main()  
  
    dim eref  
  
    eref = hs.GetEventRefByName("My Event")  
    hs.DisableEventByRef eref  
  
end sub
```
