

GetLastEvent (Event_Info_Group)

Purpose

This function returns the name of the last event that was triggered. This can be used in a script to detect which event the script was executed from.

Parameters

None

Returns

Return value: **last event**

Type: **string**

Example

Sample Code

```
sub main()  
  
    dim t  
  
    t = hs.GetLastEvent  
  
    msgbox "This script is run from the event: " & t  
  
end sub
```
