iOS Change Log

iOS release notes for HomeSeer Mobile.

v1.1.12 Release Notes

Published 10/15/20

Changes

- Fix a crash that occurs on iOS 14 when you view the events page
- Fix an identification issue with thermostats created using the HS4 Ecobee plugin

v1.1.11 Release Notes

Published 8/12/20

Changes

- Fix a crash on the device list when displaying a certain media device
- Set version for iOS and Android to match at v1.1.11

v1.1.10 Release Notes

Published 7/1/20

Changes

- Update device type identification for HS4 types

v1.1.9 Release Notes

Published 6/5/20

Changes

- Fix remote connections to plugin and recording pages
- Manage events through the "Manage Events" menu action on the Events page
- Fix a bug when loading cameras that prevents them from loading
- Other minor updates

v1.1.8 Release Notes

Published 2/21/20

Changes

- [HSM-786] - View camera recordings page for HS4 systems
- [HSM-787] - Manage plugins page for HS4 systems
- [HSM-788] - Update brand colors used in app

Bugs Fixed

- [HSM-794] - HomeSeer Mobile failing to connect and not showing an error message

v1.1.6 Release Notes

Published 8/12/19

Changes

- [HSM-755] - New HomeSeer Camera Inclusion Process Guide
- The "Register for an account" button has been removed from the login page due to new design restrictions defined by Apple.

Bugs Fixed

- [HSM-381] - Unexpected network error while trying to login
  - Error message content has been expanded on to provide more context about the specifics of the network issues.
- [HSM-233] - System version compatibility checks interrupt use

Known Issues

- [HSM-388] Landscape orientation is not yet supported on the camera details page
- [HSM-334] Crash on dashboard page when updating a widget
- [HSM-237] When editing a thermostat widget, hiding the controls is not honored

v1.1.5 Release Notes

Published 4/10/19

IMPORTANT The minimum supported version for iOS has been changed from v9.3.5 to v10.0

Changes

- [HSM-697] Automatically navigate to the device list when connecting to a session that has no widgets
- [HSM-700] - Expandable event groups

Bugs Fixed

- [HSM-223] On IOS 9 the search bar on the devices page is not displayed. The search bar we are using is only available in later iOS versions. The filters still work as expected.
  - iOS 9.3.5 is no longer supported
- [HSM-495] Devices missing in HomeSeer Mobile but showing up in HSTouch
  - A new plug-in developer document was published that outlines the recommended way to configure devices so they show up in HomeSeer Mobile
- [HSM-640] No distinction between invalid credentials and no systems being online when logging in
  - Error messages are now more specific to the situation
- [HSM-642] Lingering camera snapshot downloads sometimes crash the app when resuming from a background state
- [HSM-698] Login page layout is scrolled off-screen

Known Issues

- [HSM-237] When editing a thermostat widget, hiding the controls is not honored.
- [HSM-334] Crash on dashboard page when updating a widget
- [HSM-381] Unexpected network error while trying to login
  - More details will now be available on error messages to aid troubleshooting
- [HSM-388] Landscape orientation is not yet supported on the camera details page

v1.1.4 Release Notes

Published 2/18/19

Changes:

- [HSM-489] - Register with MyHS button added to Login page
- [HSM-490] - HomeSeer.com Link added to system menu
- [HSM-590] - Login & Help page update
- [HSM-594] - Link to MyHS account management added to system menu
- [HSM-595] - Link to HomeSeer shop added to system menu

Bugs Fixed:

- [HSM-385] - App not respecting some timezone and clock configurations
- [HSM-386] - User is logged out when opening the app from the background even though Remember Me is checked
- [HSM-488] - Dashboards are lost when logging in with a username with different case letters
- [HSM-494] - App not sending users to the login screen when the session has expired
- [HSM-550] - Internal version and store version do not match

Known Issues:

- [HSM-223] On IOS 9 the search bar on the devices page is not displayed. The search bar we are using is only available in later iOS versions. The filters still work as expected.
- [HSM-237] When editing a thermostat widget, hiding the controls is not honored.
- [HSM-334] Crash on dashboard page when updating a widget
- [HSM-381] Unexpected network error while trying to login
- [HSM-388] Landscape orientation is not yet supported on the camera details page

v1.0.3 Release Notes

Published 2/11/19

Bugs Fixed:

- [HSM-486] - Application crashes when trying to save a widget

Known Issues:

- [HSM-223] On IOS 9 the search bar on the devices page is not displayed. The search bar we are using is only available in later iOS versions. The filters still work as expected.
- [HSM-237] When editing a thermostat widget, hiding the controls is not honored.
- [HSM-334] Crash on dashboard page when updating a widget
- [HSM-381] Unexpected network error while trying to login
- [HSM-385] App not respecting some timezone and clock configurations
- [HSM-386] User is logged out when opening the app from the background even though Remember Me is checked
- [HSM-388] Landscape orientation is not yet supported on the camera details page
- [HSM-487] Dashboards are lost when logging in with a username with different case letters

v1.0.2 Release Notes

Published 2/8/19

Bugs fixed:

- [HSM-331] - Crash when receiving updates from HS3 while switching dashboards
- [HSM-332] - Application crashes when opening the Create/Edit Widget page with a null device bundle
- [HSM-336] - Application crashes when resuming from a background state
- [HSM-337] - Crash when editing a thermostat widget
- [HSM-339] - Camera snapshot request stack is null when a task starts to download a snapshot
- [HSM-341] - App crashes when trying to edit a widget
- [HSM-348] - App crashes when editing a widget that does not have a valid reference
- [HSM-356] - Unable to load the device list because of a slider range value offset
- [HSM-357] - Some network calls are orphaned on older OS versions

Known Issues

- [HSM-223] On IOS 9 the search bar on the devices page is not displayed. The search bar we are using is only available in later iOS versions. The filters still work as expected.
- [HSM-237] When editing a thermostat widget, hiding the controls is not honored.
- [HSM-334] Crash on dashboard page when updating a widget
- [HSM-381] Unexpected network error while trying to login
- [HSM-385] App not respecting some timezone and clock configurations
- [HSM-386] User is logged out when opening the app from the background even though Remember Me is checked
- [HSM-388] Landscape orientation is not yet supported on the camera details page

v1.0.1 Release Notes

Published 2/6/19

- Changed the color of the event group to increase legibility
- Improved the stability of the dashboard page

Known Issues

- When editing a thermostat widget, hiding the controls is not honored.

v1.0 Release Notes

- 2/1/19: Initial release

Known Issues

- On iOS 9 the search bar on the devices page is not displayed. The search bar we are using is only available in later iOS versions. The filters still work as expected.
- When editing a thermostat widget, hiding the controls is not honored.
