

Creating Your Free MyHS Account

MyHS is a free cloud service that will allow you to access your HomeTroller or custom HS4 installation from anywhere using a browser-enabled device, HomeSeer Mobile, or our HS3Touch app with Designer. The instructions below will walk you through the process of creating your MyHS account.

Requirements

- A registered installation of HS4 or HS3 - Request a trial license [here!](#)
- An email address - We recommend using Gmail

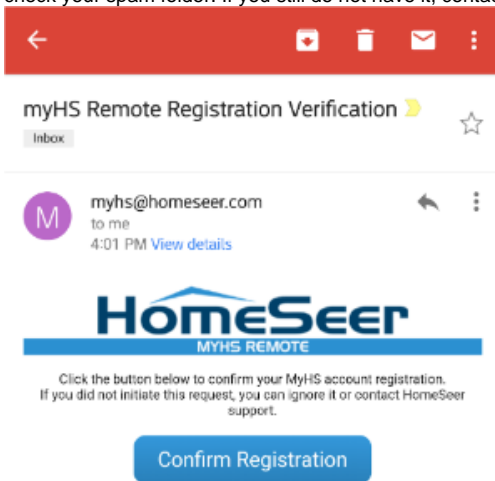

Registration

1. Go to myhs.homeseer.com/Register.

The screenshot shows the HomeSeer MyHS Remote registration page. At the top is the HomeSeer logo with 'MYHS REMOTE' underneath. Below that is a 'Register' heading. The form is divided into two sections: 'Account Information' and 'HomeSeer System Information'. The 'Account Information' section includes fields for 'Account Email Address', 'Account Password', and 'Confirm Account Password'. A note below these fields states: '8 characters minimum with 1 capital letter, 1 number, 1 special character'. The 'HomeSeer System Information' section includes fields for 'License ID' and 'License Password'. At the bottom of the form are 'Register' and 'Cancel' buttons, and a link to the 'Privacy Policy'. The footer of the page reads '© HomeSeer Technologies'.

2. Enter your desired account credentials and your HS4 license information. This can be found on the bottom of your HomeTroller [or here](#) if you purchased a license on shop.homeseer.com.
3. Once everything is entered, click **Register**.
4. You will then receive a verification email. Check your email and click the verification link. If you do not receive the verification email, make sure to check your spam folder. If you still do not have it, contact us [here](#).

Your MyHS account has now been created and your HomeSeer system can be accessed any time at myhs.homeseer.com or in the HomeSeer Mobile app! For information on setting up HomeSeer Mobile with your MyHS account, [click here](#), for setting up HS Touch with your MyHS account, visit [here](#).

Account Setup in HS4 Web Interface

After creating your account on myhs.homeseer.com, you will want to connect to your HS4 system. After connecting, navigate to **Setup**, then click on the **Users** tab. There should already be an account here with the MyHS credentials created above. If this account has not been created, enter your MyHS user name and password in the appropriate fields and click **Add**. This account should also have **Admin** and **Local** enabled under the User Type column.
