

How To Add HS-FS100-L to SmartThings Hub

Information and code on adding FS100-L to SmartThings

Purpose

This device handler provides extended feature support of this product to SmartThings new app users. For an overview of its capabilities, navigate to <https://community.smarthings.com/t/release-homeseer-indicator-light-sensor-hs-fs100-l/210181>

Important: This sensor must be added to your SmartThings hub "non-securely". Please refer to the HomeSeer user guide for more information regarding this.

To add this Device Handler:

1. Navigate to this URL and log in with your SmartThings account: <https://graph-na04-useast2.api.smarthings.com>
2. Click on the "My Device Handlers" menu
3. Click "Create New Device Handler" on the right
4. Click "From Code"
5. [Click here to view the code](#)
6. Click "Create" at the bottom
7. Click "Publish" and select "For Me"
