

How To Add HS-FC200+ to SmartThings Hub

Information and code on adding FC200 to SmartThings

Purpose

This device handler provides extended feature support of this product to SmartThings new app users. For an overview of its capabilities, navigate to <https://community.smarthings.com/t/release-homeseer-fan-controller-hs-fc200/210245>

To add this Device Handler:

1. Navigate to this URL and log in with your SmartThings account: <https://graph-na04-useast2.api.smarthings.com>
2. Click on the "My Device Handlers" menu
3. Click "Create New Device Handler" on the right
4. Click "From Code"
5. [Click here to view the code](#) on GitHub
6. Click "Create" at the bottom
7. Click "Publish" and select "For Me"
8. Now add the FC200 to the new SmartThings app and test the dimmer.

Optional Child Devices

Three additional device handlers are available for the 200+ series product line. These device handlers allow you to add additional child devices to the app that will allow you to control the features related to the custom LEDs on the products.

- [HomeSeer Normal Mode Child](#)
- [HomeSeer Status LED Blink Frequency Child](#)
- [HomeSeer Status LED Blinking Color Child](#)
