

# Updating Z-Wave Plugin

Information on updating an existing Z-Wave plugin.

## Overview

If you have an update available on your Installed plugins page, simply click the update button! If Z-Wave 3.0.2.0 or lower installed and do not see an update available. This guide will show you how to update your current install on HS4 and HS3.

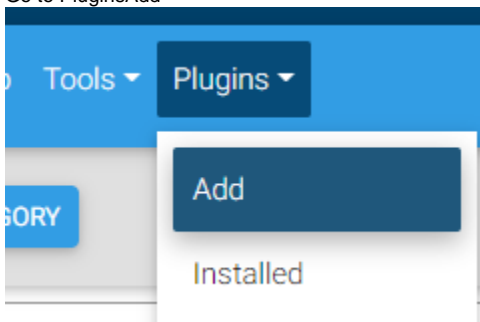

## Procedure

### NOTE

When updating your Z-Wave plugin, your existing plugin install will be overwritten but your Z-Wave DATA will not be affected. See the notes below for additional information.

## HS4 Update

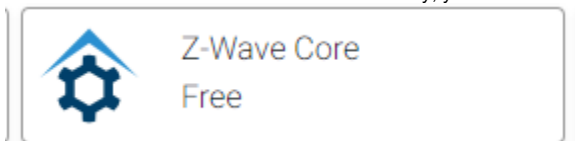

1. Go to PluginsAdd

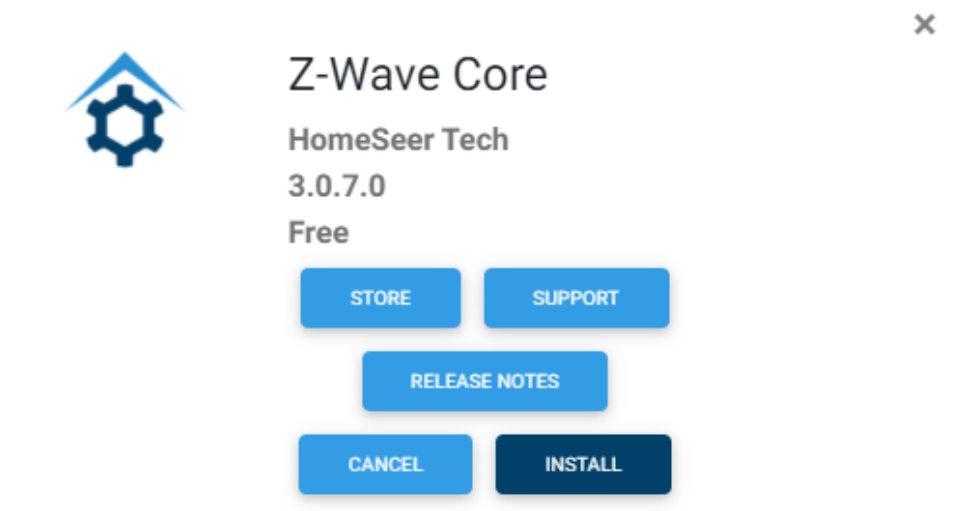

2. Click the Sync Packages icon in the top right

3. Locate the Legacy section in the Add Plugins page.
4. Locate Z-Wave Core at the bottom. Alternatively, you can search for "z-wave" or find Z-Wave Core in the list.

5. Click on the plugin card and select Install.

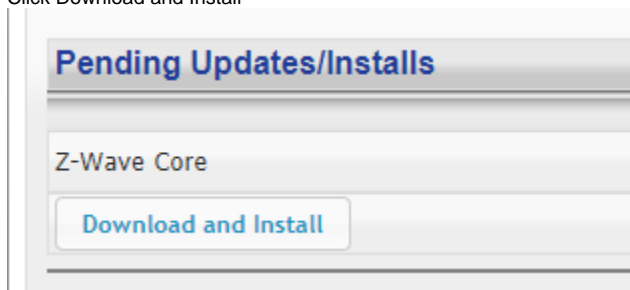

- 6. Once the Install is finished you will get a confirmation and be brought to the Installed section of Plugins.
- 7. You may need to restart the plugin by toggling it off and back on.

### HS3 Update

- 1. Go to Plug-insManage
- 2. Click Update Listings
- 3. Check the update box for your Z-Wave plugin

Installed Plug-ins <input type="checkbox"/> Developer Mode					
Plug-In	Instance	Enable	COM Port	Version	Update
HSTouch (Built-In)		See Setup			
Z-Wave			N/A	3.0.1.262	<input type="checkbox"/> (3.0.7.0)

4. Click Download and Install

5. Once finish, you may need to restart your plugin by toggling the Enable off and back on.

### Notes

If you are seeing INFO: Start Pending as your plugin status. You need to disable and reenable the plugin. If you are still seeing this error after a system restart, reinstall the plugin via the above instructions.

## Z-Wave

INFO: Plugin start is pending

3.0.7.0

Included

If you still have an entry for HomeSeer Z-Wave alongside your new Z-Wave entry on the Installed plugins page, you can disable and remove the older version. Make sure to keep version 3.0.7.0 or later.
